

Leadership & Administration in a Digital Age

The Vital Program for Future Leaders

Introduction

The key competencies for leaders who are prepared for the future are revealed in this Course N Carry Leadership & Administration in a Digital Age training seminar. During this dynamic five-day session, the trainer will weave theory, case studies, and interactive activities with the goal of preparing participants for the realities of the corporate and business world.

Participants in this Course N Carry training session will get knowledge about EQ, creativity, and innovation; they will also learn about the 4-Step Leadership In a Digital Age (LIDA) framework and how to lead change and transformation both inside and outside of their business.

The main points of this Course N Carry training lecture are:

- Find out what Industry 4.0 is and the innovative things that top global businesses are doing to get ready for the future of work.
- Get an EQ evaluation that identifies your advantages and disadvantages across four emotional intelligence domains.
- Develop your capacity for critical thought, trust, cooperation, and influence.
- Discover the 5-Step Design Thinking methodology that is used worldwide to create user-focused goods and services.
- Learn how to overcome resistance and carry out change inside your business.

Objectives

By the time this Course N Carry training course ends, you'll know how to:

- Learn critical abilities that robots cannot simulate, such as EQ, originality, and inventiveness.
- Use the 4-Step Leadership In a Digital Age (LIDA) paradigm to develop into a leader who is prepared for the future.
- Promote and execute innovation in your company using a 5-Step Framework
- Learn how to steer your organization's digital transition.
- Discover strategies for implementing, promoting, and overseeing change.

Training Methodology

The training approaches blend contemporary management theory with the real-world applications of management. The instructor will provide some theory, research, or start a conversation. A group activity (role-play, debate, case study, etc.) and a quick debrief to figure out how to apply it back to the workplace normally come next.

During the delivery, a range of resources are used, such as PowerPoint, case studies, videos, role plays, leadership development exercises, and team-building exercises.

Organizational impacts

The organization will gain a lot by sending participants on this Course N Carry training program via:

- Acquiring individuals with the future's most sought-after competencies, such as change management, emotional intelligence, and design thinking
- Gaining self-assurance in their ability to use abilities like influence, critical thinking, and strategic thinking to their daily work will enable them to develop innovative user-centric products and services.
- Lowering the organization's upcoming disruption and digitalization challenges
- Fostering an innovative and user-centric mindset throughout the company
- Enhancing their organization's understanding and use of change management, which will result in cost savings of hundreds of thousands of dollars
- Enhancing comprehension of Leadership Difficulties in this cutthroat economic world

Personal Impact

- Skills like Design Thinking, Emotional Intelligence, and Change Management—some of the most relevant and in-demand in today's corporate world—will be taught to participants.
- Important abilities like influence, critical thinking, and strategic thinking that are applicable to every function will be taught to participants.
- In order for participants to lead teams in developing User-Centric Products and Services for their competitors, they will learn the 5-Step Innovation Framework.
- The skills of ideation and brainstorming will be taught to the participants, along with how to choose the finest concepts to address problems in their sector and company.
- The 4-Step LIDA framework will be taught to participants as a means of navigating through periods of upheaval and transition.
- Participants will gain knowledge on how to spearhead, carry out, and oversee organizational transformation.
