

Performing Evaluations and Surveys of Security

Applying Best Practice in Managing Security

Introduction

For security managers, Performing Evaluations and Surveys of Security is a crucial competency. In addition to giving you a template for creating your own surveys, this conducting security surveys and assessments training course walks you through every stage of the process of performing an efficient security survey. This course will teach you how to recognise specific risks to your company's assets, employees, and property and how to mitigate them.

The material and case studies in this Course N Carry training course will walk you through every step of conducting a survey. Additionally, you will discover how to include the security survey into your continuous risk assessment and security plan. It might be difficult to determine what is necessary for security audits and assessments, as there are several factors to be consider.

A variety of risk management and security design tools will be introduced to learners in order to improve their organization's capacity for asset protection. The security staff can use the knowledge and skills they learn in this Course N Carry training course to conduct security surveys at work.

Your capacity to manage your Security Operations team, suppliers, resources, and business processes in accordance with current industry standards is validated by this training course on conducting security surveys and assessments. You will gain knowledge of every security measure required to meet changing security requirements.

This training session for Course N Carry will include:

- How and When to Perform a Security Survey
- The Elements of a Successful Security Survey
- How to Arrange and Carry Out a Safety Inspection
- How to Use Strategies and Methods for Crime Prevention to Cut Down on Crime and Loss
- How the Security Survey Can Be Used to Create a Risk Assessment
- Which security measures are available, and how and when should you use them?
- How to Compose a Security Survey Report and Offer Valuable Advice

Objectives

You will learn how to conduct security surveys during this programme, which will cover the dangers associated with both criminal activity and natural disasters like fire and lighting. The importance and function of surveys, as well as how to identify risky areas for further investigation and provide practical solutions, are all covered in this training session. The creation of operating procedures, management reports, and sales proposals will be demonstrated to the delegates.

Participants in this Course N Carry training course will be capable of the following by the end:

- Examining various industries and locations
- Investigating, minimising, and getting rid of risks
- The use of electronic protection and security personnel
- Activities that promote applying knowledge
- The training also goes over BS7499 standards.

Training Methodology

To guarantee that the knowledge offered is understood, comprehended, and retained to the fullest, this Course N Carry training course will make use of a range of tried-and-true adult learning strategies. Presentations and interactive, instructor-led conversations about each participant's personal interests will be included in this training course.

The formal lecture sessions will be supplemented by practical exercises, video content, and case studies designed to encourage these debates and maximise the benefit to the participants. Above all, a lot of case studies and examples of issues that the course leader has personally been involved with will be used by him.

Organizational impacts

Participants in this Course N Carry training programme will:

Learn about the compelling business cases for businesses to efficiently manage and plan for the protection of their physical and people resources through survey data and Security Vulnerability and Risk Assessments (RA)

strengthen their company's standing in the eyes of the industry, standard operating procedures, and capacity to carry on with business as usual in the face of current challenges.

Personal Impact

Attendees of this Course N Carry training course will have a better understanding of the risks and threats facing their organisation. They will also learn how to counter these threats and put plans, procedures, and standards in place that, if followed through on, will enhance their professional reputation and strengthen their capacity to handle complex security issues.

They also learn more about:

- Courses that are elective towards a nationally recognised security management diploma
- Acquiring expertise and abilities to carry out security audits
- Capacity to carry out managerial duties in the security sector
